Professional Experience

Head of Division – Store Channel 2021–2024

Telecom International Myanmar (Mytel) | Myanmar

- Analyzed store-channel sales data and performance metrics to evaluate sales initiatives, identify trends and recommend actions to senior management.
- Set sales targets and monitored store and team performance against revenue and customer service objectives.
- Prepared management reports summarizing achievements, operational challenges and recommended actions to support commercial decisions.
- Reviewed market trends, customer preferences and competitor activity to inform sales planning and identify opportunities for expansion.
- Coordinated store managers, sales teams, franchisees and distributors; provided training and performance feedback to support channel operations.
- Managed division budgets, cost controls and resource allocation to support operational efficiency and profitability objectives.

Store Channel Coordinator 2019–2021

Telecom International Myanmar (Mytel) | Myanmar

- Monitored sales data, customer feedback and competitor activity; prepared reports on store performance and improvement opportunities.
- Supported store managers and channel partners through product training, promotional coordination and operational guidance.
- Coordinated stock availability, customer enquiries and daily store operations while maintaining company policies and service standards.

Education

Master of Business Analytics Aug 2025–Present

La Trobe University | Melbourne, Australia

Expected completion: 2027

Master of Business Administration 2016–2018

Yangon University of Economics | Yangon, Myanmar

Bachelor of Business Management 2011–2015

Yangon University of Economics | Yangon, Myanmar

Selected Academic Projects

Melbourne Pedestrian Data Pipeline and Reporting 2026

Cloud Platforms and Analytics | Azure Data Factory, Azure SQL, Power BI

- Developed a cloud analytics workflow for Melbourne pedestrian movement data, connecting data preparation and storage with reporting in Power BI.
- Prepared hourly pedestrian measures, including counts, observation counts and variability, to support comparisons across locations and time periods.
- Documented the pipeline and analytical outputs to explain data processing and business interpretation.

NYC Taxi Data Analysis 2026

Cloud Platforms and Analytics | Databricks

- Analyzed taxi trip data in Databricks as part of a postgraduate cloud analytics assessment.
- Applied data cleaning and compared trip and fare patterns, presenting analytical findings and limitations in the assessment report.

Earlier Experience

Assistant Finance and Admin – Internship 2018–2019

WaterAid Myanmar | Myanmar

- Maintained financial records, receipts and invoices; supported salary payments, vendor payments and expense reimbursements under financial controls.
- Assisted with procurement documentation, quotations, purchase orders, meetings and travel arrangements.
